Abstract

Viral morphogenesis, production, release or  
uncoating can be inhibited by effecting inhibition of  
5 prenylation of, or inhibition of post-prenylation  
reactions of, at least one viral protein. The use of  
inhibitors of prenylation, and post-prenylation  
reactions, for example, inhibitors of the mevalonate and  
prenyl group synthesis pathways, inhibitors of prenyl  
10 group transferases and mimics of the prenylation target  
. CXXX box are disclosed.
